Automovill starts operations in Pune

Full-stack mobility start-up Automovill has launched its operations in Pune. The brand has partnered with 20 car repair workshops and established three company-owned hubs in the first phase of expansion in the city, it said in a statement. The new launch comes in line with the brand's recently announced western India expansion strategy. With this launch, Automovill has strengthened its retail presence too, in over 16 cities, it added. The start-up aims at widening its footprint in western and eastern India, with plans to open operations in five more cities within this fiscal expansion in the city. The new launch comes in line with the brand's recently announced western India expansion strategy.

Facebook blames 'faulty configuration change' for nearly six-hour outage

Facebook has blamed a "faulty configuration change" for a nearly six-hour outage on Monday that prevented the company's 3.5 billion users from accessing its social media and messaging services such as WhatsApp, Instagram and Messenger. The Facebook outage is the largest ever tracked by web monitoring group Downtechnology. The outage was the second blow to the social media giant in as many days after a whistle-blower on Sunday accused the company of repeatedly prioritising profit over clamping down on hate speech and misinformation.

Amazon and Google set to attend White House forum on quantum technology.

Amazon, Google and Microsoft are expected to join a Biden administration conference, focused on quantum technologies as the US government works to head off hacking threats and corner a burgeoning growth industry. The White House's Office of Science and Technology Policy (OSTP) is hosting the event that will discuss critical applications of quantum computing, which is expected to operate millions of times faster than today's advanced supercomputers. President Joe Biden's administration is especially focused on the national security implications of quantum technology, which promises the ability to easily crack encryption standards in use today.
